## Ready for entertaining

For a family that loves to cook and entertain, the decision to renovate this dated kitchen was a necessary one. The existing kitchen and adjoining laundry room were completely gutted to create the new footprint of their kitchen. The homeowners worked closely with designers at Premier Kitchen & Bath to fully utilize the square footage. New shaker-style cherry wood cabinets with a pecan stain were added to create a clean yet warm effect. Granite countertops were chosen to allow all surfaces to handle hot pans, pots, and baking sheets. Varying sizes of tumbled marble tiles from Boston Tile were used for flooring. The kitchen, now open to the dining room, is the perfect gathering spot for all family activities and entertaining. Vietri coffee pot and cups from Runcible Spoon. Lutron Lighting System from J&K Electric Supply Co. Upholstered dining room chairs from McKay's Furniture.
